

US-PAT-NO: 6700506

DOCUMENT-IDENTIFIER: US 6700506 B1

TITLE: Bus arrival notification system and methods related
thereto

----- KWIC -----

Brief Summary Text - BSTX (17):

In U.S. Pat. No. 5,680,119, there is described a vehicle identification system wherein types of vehicles such as emergency, school bus or other public transportation, delivery or service vehicles with emitters transmit an identifiable signal corresponding to the vehicle type. This patent does not describe a method for identifying a unique vehicle of a particular class, but rather only a method for determining the type of vehicle. Thus, the system merely differentiates between a school bus and an ambulance.
